 **SPACEWOOD**® Product

INNOPAN PRESENTS

POLYMER RANGE

POLY GLOSS | POLY MATT | POLY PRINT | POLY METAL

WHY POLYMER?

Q. What is Polymer Finish ?

A. The polymer is PET foil pressed on MDF / HMR HDF on the top side and Pre-lamination on the backside.

Q. What is Base material of Polymer ?

A. Base material is MDF / HMR HDF

Q. Can we do on Plywood ?

A. No

Q. What are the different finishes in polymer?

A. Polymer comes in 4 Finishes:
Polygloss | Polymatt | Polymetal | Polyprint

Q. How many colors are offered in Polymer?

A. More than **20 colors** are in offering.

Q. What is the warranty offered?

A. MDF base **5 years** and on HMR HDF Base **10 Years**

Q. What about Edge banding?

A. Polymer shutters come with **1.3 mm PVC / ABS / Acrylic -**
Edge band of matching color

Q. Can we fix edge Profile Handles?

A. Yes, we can fix any Edge Profile Handles.

Q. Who all are using Polymer?

A. Polymer – PET Boards are used by all leading kitchen companies in EUROPE especially Nobilia, Nolte. They don't use Acrylic but use these boards as an alternative to Acrylic.

Q. Is it Better then HPL?

A. Of course, High gloss HPL is low in gloss as a glossy surface created by press plate. This is more comparable to Acrylic.

TECHNICAL SPECS OF PET FOIL

Q. What is the thickness of PET Foil?

A. Thickness of PET foil is 0.25-0.3 mm

Q. What is the Gloss level of Poly Gloss & Polymatt Shutter?

A. PET Shutters have 95 % Gloss which is more than membrane but lesser than Acrylic. Super Matt is 5%.

Q. What is Scratch resistance of PolyGloss / Polymatt?

A. Scratch resistivity is 5H +

POSITIONING

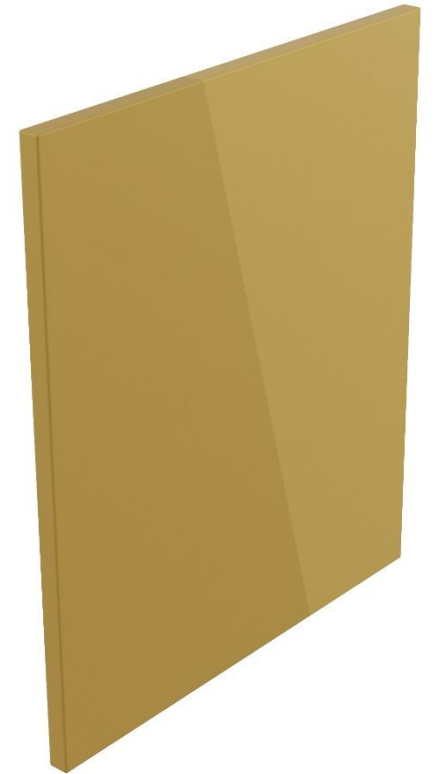

Q. How is it positioned ?

A. It is alternative to acrylic and cheaper price and upgrade from HPL in more or less same price
